

PLEIN AIR WORKSHOP WITH RON SANDERS

Sponsored Bucks County Art Workshops

<http://www.buckscountyartworkshops.com/weekend.htm>

June 11-13, 2010

PLEIN AIR OIL, ACRYLIC, WATERCOLOR

Plein air painting demands a direct statement of color produced by light. Learn how to quickly mix clean, bright colors and beautiful neutrals through an understanding of principle primaries and the four properties of color: hue, temperature, value and chroma. Develop a sensitivity to temperature based color common to outdoor painting and how to mix color using analogous vs. complimentary colors. Through lecture, studio exercises, demonstration and field painting students will learn to build better landscapes by "seeing, simplifying, and subordinating." In combination with compositional tools, students will plan paintings for bolder form, increased spatial depth, and a stronger statement of focal point that will take your paintings from ho-hum to wow!
